

AIR GAP DRINKING WATER FILTER FAUCETS

Air gap drinking water filter faucets by SpiroPure provide an attractive solution for any space. The optional air gap allows you to use it for either an RO system or for non-RO undersink water filters. The NSF 61 certified, heavy duty design means your family has long-lasting safe access to crisp, healthy water.

- Optional air gap for use with RO systems or non-RO undersink water filters
- NSF/ANSI Standard 61 certified for lead-free access to drinking water
- 3-line water faucet comes with the air gap and 1/4" tubing pre-installed for ease of installation
- Single-handle lever twists 90 degrees while faucet spout swivels 360 degrees for versatility and convenience
